The Development of Computer Science and Engineering at Texas A&M Under Dick Volz

Jianer Chen
Jeff Trinkle
Jennifer Welch
Lawrence Rauchwerger
The Early Years – Jianer Chen

• Dick hired me as an assistant professor in 1989 (more correctly, 1990)
• A very busy interview schedule which made me have no time to go to bathroom
• gave two talks on the same day and had to make an additional meeting with a big professor (Bruce) at 6pm before dinner
The Early Years – Jianer Chen

• I was heavily involved in the Motion Planning research at NYU.
The Early Years – Jianer Chen

• I was heavily involved in the Motion Planning research at NYU.
• Dick was probably hoping that I could continue the research and support our robotics research at A&M
The Early Years – Jianer Chen

• I was heavily involved in the Motion Planning research at NYU.
• Dick was probably hoping that I could continue the research and support our robotics research at A&M
The Early Years – Jianer Chen

• However, I became interested in many other things that Dick (and I) did not expect
The Early Years – Jianer Chen

- However, I became interested in many other things that Dick (and I) did not expect
The Early Years – Jianer Chen

• Though (probably) being disappointed, Dick had kindly allowed me to pick my own research directions;
• Though (probably) being disappointed, Dick had kindly allowed me to pick my own research directions;
• and he had been very supportive:
The Early Years – Jianer Chen

• Though (probably) being disappointed, Dick had kindly allowed me to pick my own research directions;

• and he had been very supportive:
  1. did not fire me (proof: I am still here);
The Early Years – Jianer Chen

• Though (probably) being disappointed, Dick had kindly allowed me to pick my own research directions;

• and he had been very supportive:
  1. did not fire me (proof: I am still here);
     2. wrote a good recommendation letter for my tenure evaluation (Proof: I made my tenure);
The Early Years – Jianer Chen

• Though (probably) being disappointed, Dick had kindly allowed me to pick my own research directions;

• and he had been very supportive:
  1. did not fire me (proof: I am still here);
  2. wrote a good recommendation letter for my tenure evaluation (Proof: I made my tenure);
  3. …. (Dick: Thanks!)
The Early Years – Jianer Chen

• What is bad?
The Early Years – Jianer Chen

• What is bad?

• I found that the following was probably bad (well, to me, but it is probably good for Dick).
The Early Years – Jianer Chen

Dick and Jianer in 1991
The Early Years – Jianer Chen

Dick in 2004 and Jianer in 1991

The Early Years – Jianer Chen

Dick and Jianer in 2004
The Early Years – Jianer Chen

Dick has not changed much but Jianer has become sooo old
Greetings from afar

• The next segment is from a former colleague of ours, Jeff Trinkle, who was not able to be here in person.
The Amazing Volz

from

Jeff Trinkle
Dick: My Chairman

• Set the tone to build the A&M’s CS Dept
  – Fair
  – Honest
  – Straight forward
  – Expected the best from everyone
  – Led by example (How could any one person do so much so well for so many people?)

• As chairman at RPI
  – My goal: Emulate Dick
  – My conclusion: Impossible!

Excited to start as Chairman, RPI 2003
Dick: My Mentor

- Great research direction ideas
- Supportive:
  - Fabulous detailed advice on papers and proposals
  - Created opportunities for me
  - Shielded me from politics
  - Taught me how to approach funding agencies
- Shared deep insights before my decision to become chairman at RPI
- Launched my career

Happy Researcher, Robotics Lab, Bright Bldg 1994
Dick: My Friend and Role Model

- Thanks for doing what friends do
- Thanks for pushing me to greater heights
- THANKS FOR EVERYTHING!

After trying to maintain Dick’s pace for 6 years as Chair of CS at RPI:
No hair, Gray beard
But no TIE!!!
The Middle Years – Jennifer Welch

- Dick hired me as an assistant professor in 1992
- Note early morning meeting time!

---

Department of Computer Science
Texas A&M University

SCHEDULE
for Prospective Faculty Candidate
Dr. Jennifer Welch (see attached vitae)

Arrival: 5:10 pm on Thursday, 2/13
Lodging: College Station Hilton, confirmation #4756
Room and tax are direct charge to the Department
Departure: 6:00 pm on Friday, 2/14

**Wednesday, 2/13**

5:10 pm Dr. Friesen will pick up from Easterwood Airport and escort to the Hilton
7:00 Dinner with Laxmi Bhuyan and Wei Zhao (will pick up from the Hilton)

**Thursday, 2/14**

7:30 am Breakfast with Richard Volz
9:00 Seminar in room 302 HRBB, cookies & coffee served
(see attached colloquium announcement)
The Middle Years – Jennifer Welch

• Although there was some ugly politics going on at that time, he shielded the assistant professors from it

• He made the department a great place to grow and develop a career

• He provided me with invaluable help in obtaining funding
  – Especially industrial matching money for my PYI
Dick was very supportive of women faculty and students
  – Presided over the birth of AWICS (Aggie Women in Computer Science)
    – At the first AWICS meeting held at Nancy’s house, he was the only male, other than Nancy’s dog
  – Was very flexible in altering my work schedule when both my sons were born
The Middle Years – Jennifer Welch

- Dick’s hallmark was quality
- Emphasis on metrics to prove increase in research quality
The Good: The Later Years to the Present
Lawrence Rauchwerger

• 1996: Lawrence joins the CS department
• Why?
  • Because Dick is supportive of women in CS
  • He likes Nancy
  • He is worried Nancy will follow husband (as it should be...)
• He invites Lawrence for an interview....
The Good: The Later Years to the Present

• Good Friday 1995
• Meeting for breakfast at 7:30am at the Hilton
• However dept saves money and puts up Lawrence in Nancy’s apartment
• Lawrence gets Dick’s good (better) ear and talks about artillery shells and their soothing effect on hearing
The Good: The Later Years to the Present –

- Almost nobody is in the department to talk to him (Good Friday – Univ. closes at noon)
- Interview finishes after talking to Mac and Hank (who hopes Lawrence will get back into semiconductors)
- August 1995 Lawrence gets an offer – come over now! -- Answer – Yes, but 1 year later.
- Salary negotiated – needs to be higher than Nancy’s – Dick understands and agrees +2k
The Good: The Later Years to the Present –

• 1996 – Lawrence shows up
• Lawrence is introduced and known as Nancy’s husband –
• Lawrence pounds on Dick’s table: Needs a bigger workstation - $20k worth UltraSparc 1…. And gets it
• 1998 – gets NSF CAREER award. Dick agrees that Lawrence has a different last name than Nancy
The Good: The Later Years to the Present –

• 1998 – 2003 – the early post Dick era – CS dept is soul searching … Jennifer makes the best of it as interim head
• 2003 – Valerie starts running the show
• 2004 – Stroustrup gets on board – Dick is worried we will become a C++ Mecca
• 2008 – We get a King Abdullah University (KAUST) award – Dick was partially right
The Good: The Later Years to the Present –

• Dick set us on the right path: ~40 tenure/track faculty
• NAE, IEEE/ACM Fellows, over 25% faculty with NSF CAREER
The Good: The Later Years to the Present –

• Dick’s real legacy:
  7 female faculty
  Found solution to 2 Body problem
21st Century Photos

• Thanks to Kathy Flores for culling through tons of photos to find these and provide them.
